PROJECT NAME	CRUDE OIL PRICE PREDICTION

- Building a Flask Application by creating HTML pages stored in the templates folder and a python script app.py for server-side scripting
- app.py - contains the actual python code that will import the app and start the development server.
- Crude_oil_price_prediction.h5 - This is our model weights file that will be generated when the model is trained.
- static - contains static files i.e., CSS, JavaScript, and images.
- templates - This is where you store your HTML templates i.e., index.html, lweb.html
